Re: Boys & Girls Club

Dear Pat Elwood,

Thank you for your participation in the Boys & Girls Club remodel in Federal Way. Your generosity made an incredible impact on the day to day operations of the Club and the children they serve.

The Club now has an all new electrical service including updated lighting. A new heating system has also been added to ensure year round comfort. Prior to the heating and ventilation work, the club was cold in the winter and full of stale, muggy air in the summer. With more efficient equipment, the Club indoor environment is not only more comfortable and healthy, but scarce operating funds can now be directed to activities for the children rather than paying utility bills.

A brand new kitchen was added that will give the Club the opportunity to serve hot meals to the children who were unable to have breakfast at home and provide for snacks after school. The expanded kitchen may be one of the more impressive spaces of the remodel when comparing before and after photos.

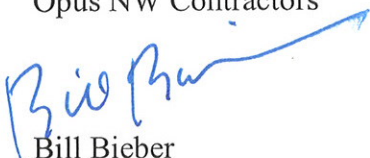

On the administrative side, offices were relocated and expanded making the working environment more efficient and comfortable for the staff. The game room was increased in size and a large shed built outside for a place to store supplies. Just about every square inch, both inside and out received a new coat of paint as well.

In short, the Club hasn't looked this good since the early 70's when it was originally built. We will be sending out invites in the near future for a BBQ to be held on June 18<sup>th</sup> at the Club in Federal Way to formally thank everyone for their participation.

Thanks again, it was a fun project to work with you on.

Sincerely,

Opus NW Contractors
